

How You Can Join the Storm Spotter Network (Bureau of Meteorology)

http://www.bom.gov.au/storm_spotters/index.shtml

An important component of the Australian Bureau of Meteorology's Severe Thunderstorm Warning Service is a national network of volunteer Storm Spotters who provide "on-the-spot" information on damaging thunderstorms.

If you would like to join the Bureau's storm spotter network you need to be:

18 years of age or older, and a resident of Australia.

To join, print out and complete the Spotter Application Form (pdf) and post it to your local Bureau Regional Office.
